

NEC Freestand Totem

Flexible indoor signage

With so many options open to you, the NEC Freestand Indoor Totem offers the flexibility to create an experience for your audience whilst meeting your business needs.

Basic

Storage

In terms of design, choose from three different surface options: Non Glass, Anti-Glare Acrylic Glass or Touch, compatible with any NEC Touch Display. The Anti-Glare Acrylic Glass ensures the display is protected against vandalism yet offers clear visibility without reflection. With 20 RAL colour palette options you could match to your brand, or you might want to exude luxury with a gold surround?!

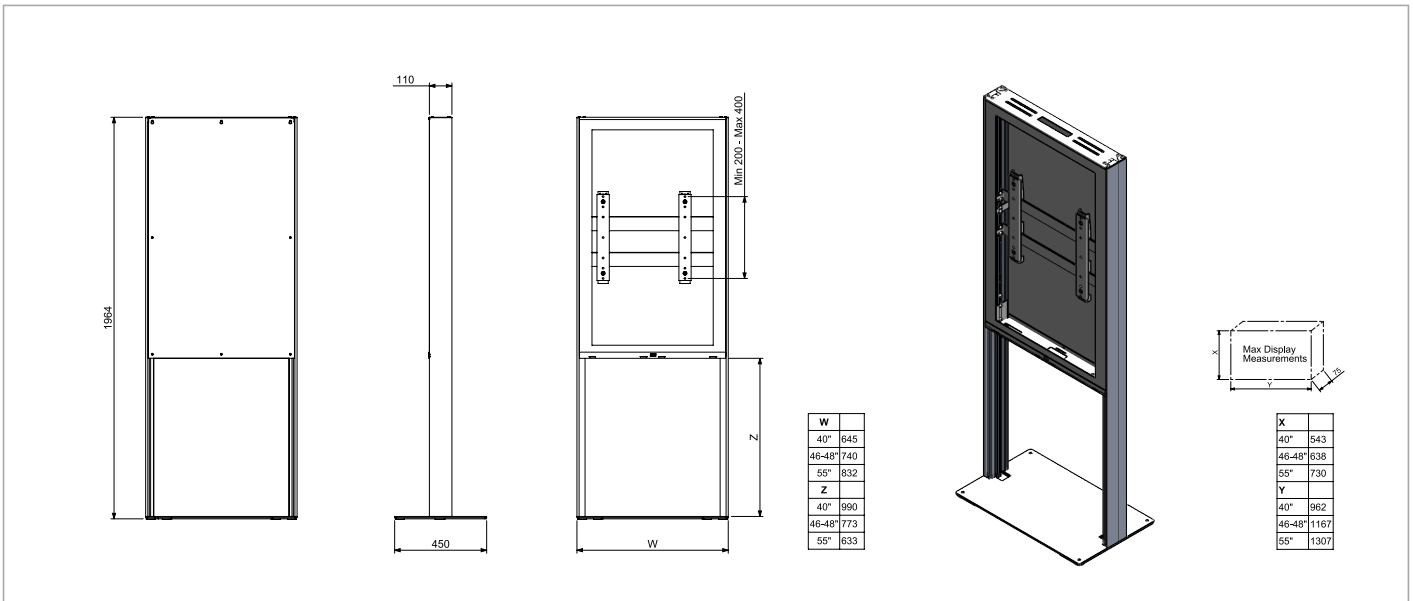

The unit is sealed for security but can be accessed easily should maintenance be required or if future applications demand upgraded performance levels. The Storage option allows space for safely locking away valuables or collateral. Alternatively the Basic two leg option offers a lighter, free-flow form for more airy environments. Compatible for screen sizes from 40" – 55", the totem is designed for indoor signage where audience eyeballs are in fairly close proximity. Take a closer look and start customising your perfect Totem!

Delivering Genuine Benefits

- **Three surface options** for ultimate flexibility
- **Four standard colour options** available with short lead-time or 20 special colour options for customisation
- **Basic version** with airy design or **Storage version** with lockable storage space
- **Quick and easy access** to the display for upgrades or maintenance
