

Hiperwall 9.0

The beating heart of the modern control room

The Hiperwall 9.0 video wall control system offers secure and dependable performance with unlimited flexibility in mission-critical environments.

Why Choose Hiperwall?

Utilise your existing (or independent) network infrastructure to build your control room with scalable adaptability, reducing cost and waste.

-  **User-friendly**
-  **Resilient**
-  **Cost-effective**
-  **Secure**
-  **Future-proof**
-  **Flexible**

Distributed Visualization Architecture – the total processing power increases as the Hiperwall system expands.

Standard Ethernet – reducing cost and complexity, ethernet is the only infrastructure needed for unlimited flexibility.

Hardware Agnostic – allowing the user to repurpose existing hardware and upgrade incrementally, saving costs and reducing e-waste.

Unlimited Scalability – the IP-based system allows connection of any number of displays, with no limitation of resolution, or orientation.

Unlimited Sources – the IP-based system allows connection of any number of sources, of any type.

Resilience to Failure – 24/7 fault tolerant system and security controls give complete peace of mind.

Access Controls – powerful user-authentication system with multiple levels of accessibility.

System Backup – easy save and restore of settings with HiperCare, plus tech support, training and network diagnostics

Why choose Sharp/NEC to partner with Hiperwall?

- **Widest choice** of display technology for the perfect-fit
- **Trusted reliability** for 24/7 operation
- **Failsafe operation** for mission-critical performance
- **Embedded computing** for seamless customisation
- **Expert consultancy** experienced in critical system design

For the largest control rooms

Purpose-designed for the most complex or geographically dispersed control centres.

For critical environments such as blue light, transportation, manufacturing, and utilities, etc.

For the smallest control rooms

Every organisation needs a control room to centrally manage operations.

Our entry-level **Hiperwall Essentials** are designed for SMEs, universities, shopping malls, small government agencies, and local law enforcement, etc.
