

Sharp/NEC & Cisco

Smarter collaboration and conferencing with Cisco

Connect your Sharp/NEC displays with Cisco collaboration devices using just one cable. It's an easy way to upgrade your meetings and streamline the way you connect with your colleagues. With this plug-and-play solution, you can enjoy the best possible communications experience with pre-configured colour settings and low latency for true lip-sync optimisation on video calls. The integrated auto-switch source detection for incoming calls makes sure you'll never miss a call during a meeting again.

The Cisco collaboration devices partner ecosystem is built on a certification program to ensure that customers get the best experience out of their Cisco collaboration devices and make integration as seamless as possible when integrating with third-party technology. Verified third-party solutions meet Cisco's high standards for delivering high quality and ease of use.

Benefits of combining Sharp/NEC displays with Cisco collaboration devices

- Plug & play setup via 1x HDMI cable to the screen
- Auto input change for incoming calls
- Low latency mode for better lip sync
- Optimized colour pre-set for presentation and video conferencing
- Switch off/on the display automatically

With professional brightness and haze levels, you can now let the daylight into your meeting without compromising picture quality or clarity. Sharp/NEC displays, with high quality standards and the sleek design, provide a natural match to the Cisco Room Kits. The portfolio of certified screens fits any meeting scenario, which together with the Cisco collaboration devices, can bring video conference to rooms of all sizes, from huddle spaces to extra-large boardrooms and team rooms. The Cisco Touch 10 control unit makes starting and controlling your meeting environments intuitive and straightforward with just a touch of your finger. Think smarter meetings, smarter collaborations, and smarter presentations.
